

The village of Bayencourt (France, Somme) officially wishes to reconnect with your municipality to honor the exceptional history that has linked us for over a century.

In 1924, your town showed immense generosity by funding our water tower following the destruction of the Great War. To this day, this structure stands as a testament to that solidarity, just like the streets Bayencourt North and South located in your town.

Despite our small size, we are proud of this heritage. We would like to propose the formalization of this bond through a Friendship Pact. This symbolic gesture, without any budgetary constraints, would allow us to:

Preserve the shared memory of our two communities.

Promote our shared historical heritage.

Initiate cultural or digital exchanges between our residents.

We would be honored to receive your thoughts on this proposal in order to revive this unique Franco-British friendship.
